

Subscriptions Flow AI

Team Keepify

Liang Chu, Joseph Skinner, Namsang Subba, Isaac Traina, Jonathan Vu

Shopify Ecosystem

Merchants

Platform Use

Conduct global e-commerce business at scale.

Products

Diversity

Sell everything from physical goods to digital products.

Market

Economic Impact

~\$300 billion in total revenue flow through the platform.

5 Million
Merchants

6 Million
Stores

1 Billion
Shoppers

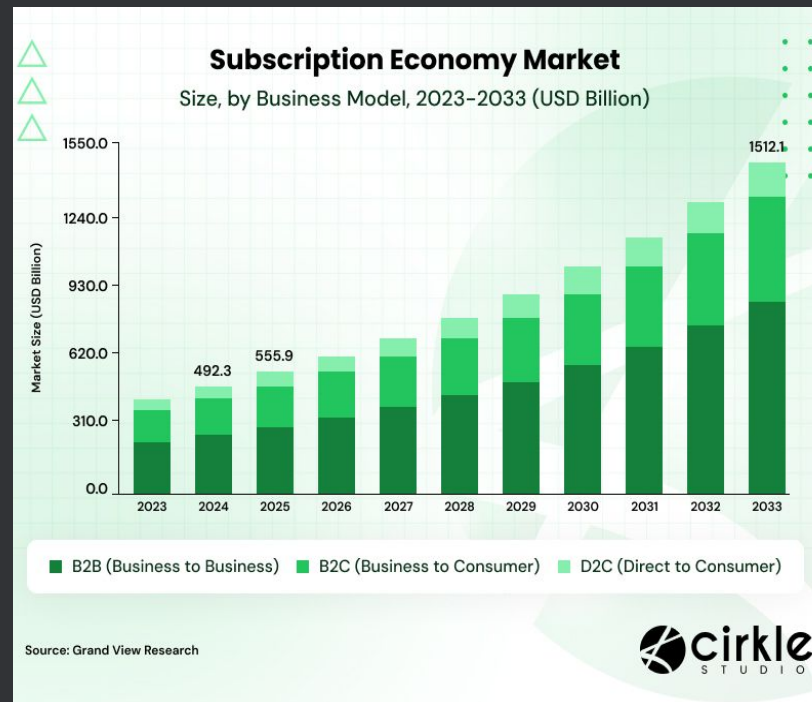

Product Specifications

Primary Users

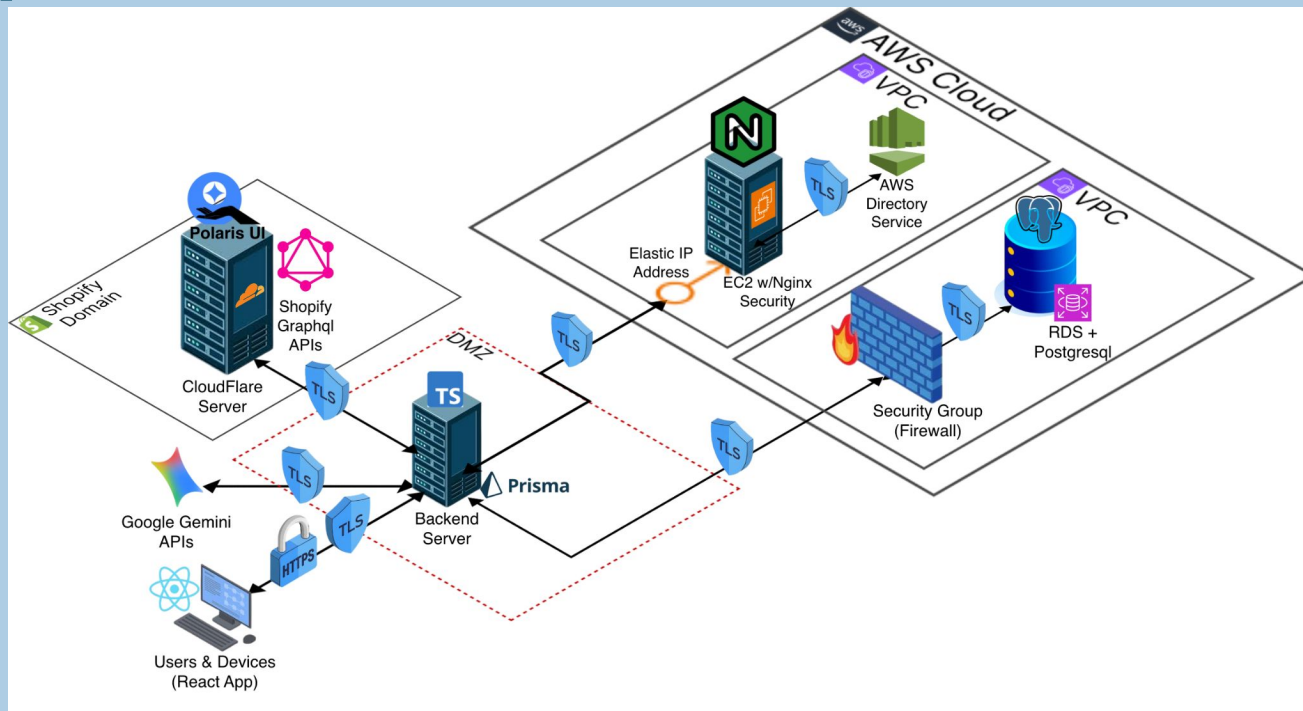

Merchants on the Shopify platform selling subscription based products

Features

- Support merchants selling subscriptions
- Leveraging AI to monitor, report, prevent churn
- Shopify native experience

System Architecture

Semester Goals

Production Ready

- Complete the MVP
- Fix major bugs
- Deploy to AWS

Gather Feedback

- Conduct team testing
- Run SUMI usability survey
- Collect sponsor feedback

Fulfilling Requirements

- Implement core subscription features
- Meet sponsor expectations
- Submit app for review

	Nathan Moore	1	0	\$13.50

► Trade Offs

01 Cloud

- Assessed AWS cloud requirements vs. native Shopify API capabilities for feature implementation.
- Properly allocating compute hosting and storage resources

02 AI

- Hosting ourselves vs API calls
- Balance number of free calls vs long-term cost
- More AI vs practical usage

03 App Development

- Polaris UI vs Plain HTML + CSS
- Creating manual bulk queries vs Using GraphQL nested queries
- Improving existing features vs Implementing new features

04 Feature Management

- Focused on: subscription management, AI features
- Backburner: more email features, win back customers

► Quality Assurance

Tickets Completed

Of the work the team added to the product backlog, how much was actually completed?

66 out of 78

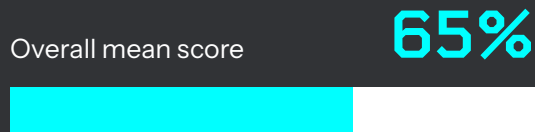

Most incomplete are bonus features

SUMI Survey

How did our live testers evaluate the main branch through testing each use case?

Considered "moderately positive"

Sponsor Testing

What percentage of issues identified by the sponsor were addressed?

9
Issues found and fixed

Future Considerations

Review Process

- Requirements
- Beta account
- Approval status
- Listing

Future Enhancements

There are many bonus features that can be added.

Hosting

Our app will continue to be hosted an beta tested on.

Hand-off

Ensuring that the sponsor's team is well-equipped.

▶ Lessons Learned

01 Create as many workarounds for Shopify processes as possible.

From getting support to getting approved, their turn-around time was significantly longer than promised.

02 Reflection on lacking processes is key.

Continued communication on what needs improvement allowed us to grow increasingly more efficient.

03 Smaller milestones and goals helped unify the team.

Having smaller goals such as deployment, or approval submission always helped unify the team whenever the project started losing momentum.

04 Our team was one of a kind.

We covered each other's deficiencies incredibly well and had great cohesion since day one.

Fun Fact

At the time of this presentation,
our Shopify app submission has
not been assigned a reviewer for
__ days.
