

Final Retrospective Notes

Presentation Results

- All students, 1 other (could be Afia)
- Project and Product Evaluation - strongly agree / agree
- Could have talked more about challenges.
- A live demo would have helped.
- Improvement over last semester's presentation.
- The explanation of architecture was solid.
- Strongly agree to time used effectively
- Strongly agree to professionalism
- Overall performance was exceptional
- Get a bit more info on lessons learned (in other words we didn't have it as a specific slide).
- How did we find and handle testers?
- Could explain design choices better.
- How was the AI trained? Results?
- We seemed knowledgeable about the project domain and explained it well.
- We as a team don't seem to hate each other.
- Realistic project.
- Transparent about process and trade-offs.

Sponsor Feedback

- There wasn't much qualitative feedback, just numbers.
- The only 4 rating was being short on time for reviewing, the rest were 5's.
- He was genuinely impressed with us, specifically with the presentation.

Technical Report

- Why 1/20 for the second set of milestones?
 - Corresponds to a deliverable.
- Did we actually go through with SUMI?
 - Yes, we each found a tester to go through the full survey of the app.
- Our document mentions that our app was not approved.
 - Malachowsky will make a note of our app being approved today.

Peer Evaluations

- Quality - Liang/Isaac 5, everyone else close behind
- Quantity - Everyone 4.8 except Joe who was 4.6
- Initiative - Joe 4.8, everyone else 4.6

- Dependability - Same score all around
- Interaction - Same score all around
- Team meetings - I don't remember but I think they were close
- Overall - 4.8 for all except 4.6 for Joe (he may have rated himself low)

Project Review Doc

- Our advice for future students was kind of generic.
 - To be fair, we were not great at estimating and needed to improve on that.
